## INLAND EMPIRE ENERGY CENTER PROJECT MODIFICATION WORKSHOP

**Purpose:** The California Energy Commission (Energy Commission) staff will hold a workshop to discuss the amendment petition filed by Inland Empire Energy Center, LLC (IEEC). IEEC is seeking approval to modify the Inland Empire Energy Center Project by changing the previously-approved power generation configuration consisting of two GE PG-7251 combustion turbines, to a proposed new configuration of two GE 107H combined-cycle systems. In addition, IEEC is requesting to add an additional temporary laydown/parking area near the project site. IEEC indicates that the proposed modifications would increase generation from 670 to 810 megawatts, increase operational efficiencies, and enhance the project's economics with only minor changes in air emissions.

This workshop will provide an opportunity for members of the public, the project owner and/or any interested party to discuss the amendment petition. If you are unable to participate in person, written comments may be sent to Connie Bruins, the Commission's Compliance Project Manager at the address below.
